	Examiner Hoang M Nguyen	Art Unit 3748	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claims 3, 8-12, 17-18, are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on July 15, 2004 on the ground that the PTO should not go through trouble and expense entailed in multiple filing and prosecution. The Examiner disagrees because multiple filing is necessary in this case because there are many patentably distinct species and it's not the Examiner's burden to examine all species at the same time.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2, 13-14, are rejected under 35 U.S.C. 102(b) as being anticipated by US 4274044 (Barre).

Barre discloses a solar energy system comprising a single solar cell 5, and an dc-dc converter as a power conversion device.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Art Unit: 3748

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4-7, 15, 19-20, are rejected under 35 U.S.C. § 103(a) as being unpatentable over U.S. 4274044 (Barre) in view of U.S. 6703555 (Takabayashi et al). Barre discloses all the claimed subject matter as set forth above in the rejection of claim 1, but does not disclose an exposed wire portion, and many layers as claimed. Takabayashi et al is relied upon to disclose to have solar cell having many layers including conductive layer, semiconductor layer..etc.. and exposed wire portion. It would have been obvious at the time the invention was made to a person having ordinary skill in the art to modify the solar cell system in Barre to use the type of solar cell in Takabayashi et al for the purpose of more effectively converting energy.

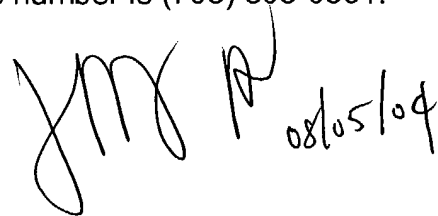

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Petrillo and Tsuzuki et al disclose solar cell systems comprising many layers.
